

ICE³²

**SUPER
CONCENTRATED
FORMULA
WITH DYE!**

HIGH PERFORMANCE Auto A/C Treatment

Improves A/C cooling capacity & extends system life.

- Provides colder air by improving heat transfer
- Reduces friction which cuts down wear on metal parts and seals – EXTENDING COMPRESSOR LIFE
- Eliminates moisture preventing oxidation and acid
- Helps cut humidity - drier air improves cabin comfort

HOW DOES ICE³² WORK?

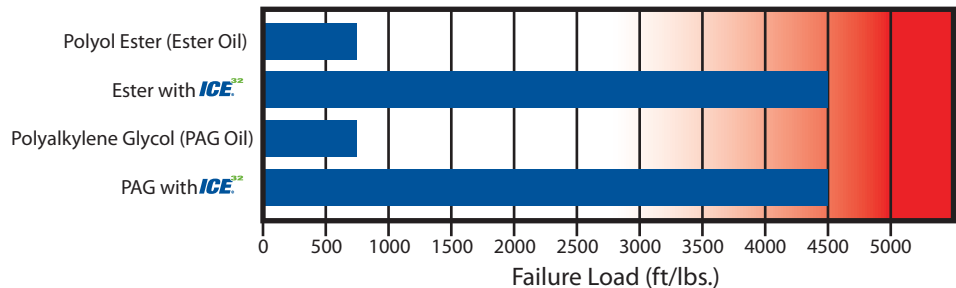

ICE 32[®] creates a film that seeks out and adheres to metal surfaces. Its polarized & modified molecules power through air conditioning systems, providing better flow and improved cooling performance.

Meets or Exceeds
SAE J2670
in auto A/C systems using R-134a

Part #OB-1
